That way people wouldn't even try copying it. So Wiley started hiring a team of people that would work on that title, and these people would read a big book on how to create really long titles. They got all the things you need to know about a title, like divisions, chapters and even some fancy words like "oligopsonist". They had to learn how they could fit all of those things in the title. So they started writing the book and it became so long that they couldn't fit it all in one book, so they had to split the book up into multiple parts which led to Librolosasesinosdelvaticanopdf - Part I: Definition. They finally finished the whole book and went to print however, some of the chapters were really long so they had to break them down even further. That's how the book got so many pages. In fact, it has so many pages that they couldn't fit it in one building, they had to build a new one just for this book. The last thing you might be wondering is who would buy this book? The answer is no one! Even though the title of this book is super long and difficult to remember, it's extremely difficult to read. It has been said by multiple people that it's very boring, especially when you get stuck on a word like "oligopsonist".
